# Ibrahim Saeed Mohammed Saif

Malaysia | dev.ibrahim.saif@gmail.com | +60 18-230 1054 | github.com/IbrahimSaif197

## Professional Summary

Full-stack Computer Science graduate with production experience building type-safe web and mobile apps end to end, from React interfaces to secure APIs and databases. Proficient in **TypeScript**, **React**, **React Native**, **Hono.js**, and **PostgreSQL**, with experience implementing RBAC, optimizing database queries, and deploying serverless.

## Experience

**Freelance** | Full-Stack Developer Feb 2026 – Jul 2026

- Built the bilingual (Arabic/English) **React Native (Expo)** app for **Eejari**, with right-to-left layouts.
- Hardened Eejari for launch: OTP sign-up and password reset, rate limiting, ID-verified landlords, account deletion.
- Shipped **Neo CRM** to production: a tested, validated service layer for leads and visa-tracking fixes.

**Astra Velocity Sdn. Bhd.** | Software Engineer Intern Sep 2025 – Jan 2026

- Built **Neo CRM**, a lead-management system for a study-abroad agency, on both tiers: a **React** and **Tailwind CSS** dashboard with CSV import/export and dark mode, and a **Hono.js** API on **Cloudflare Workers** with **Prisma**.
- Added live EMGS visa-status tracking via scraping, and RBAC separating admins from counsellors.
- Built the **Hono.js** API for **Eejari**, a property-rental app for tenants, landlords and admins: listings with filters, sorting and pagination, image uploads, reviews and admin moderation.
- Optimized **Supabase (PostgreSQL)** query patterns, cutting average query response time by **20%**.
- **Tech Stack:** TypeScript, React, Tailwind CSS, Zustand, Hono.js, Cloudflare Workers, Prisma, Supabase.

## Technical Skills

- **Languages:** TypeScript, JavaScript, SQL, Python, C#, Java, C.
- **Frontend:** React, React Native (Expo), Next.js, Tailwind CSS, Zustand, HTML, CSS.
- **Backend & Cloud:** Hono.js, Node.js, Bun, FastAPI, ASP.NET Core, Cloudflare Workers, AWS (SNS, SQS), Supabase, PostgreSQL, Prisma, REST APIs.
- **Tools & Libraries:** Git, GitHub, Zod, Postman, VS Code.

## Projects

**Agensity – Multi-tenant SaaS CRM** | *Hono.js, Cloudflare Workers, PostgreSQL* Private repo

- Built a bilingual CRM that tracks study-abroad students from application to arrival, with a student portal.
- Wrote auth from scratch with **bcrypt** and **JWTs**; isolated tenants with PostgreSQL row-level security.
- Added CI that replays all migrations on an empty database and fails the build on schema drift.

**Earshot – On-device AI Meeting Assistant** | *TypeScript, whisper.cpp, llama.cpp* Private repo

- Built a Windows app that runs speech-to-text and an LLM on-device for live transcripts and meeting summaries.

**EduPeer – AI Tutor (Final Year Project)** | *TypeScript, FastAPI, Claude API, Firestore* Github

- Built a VS Code extension and **FastAPI** backend that tutors novice programmers with hints, not code.

**SiagaBantu – Disaster Relief Platform** | *ASP.NET Core, MySQL, AWS SNS/SQS* Private repo

- Built a C# app for evacuation centres to request aid, with event-driven alerts via **AWS SNS and SQS**.

## Education

**Asia Pacific University (APU)** | Bachelor of Science (Honours) in Computer Science Sep 2023 – Sep 2026

- **Relevant Coursework:** Backend Development, Software Engineering Systems, Data Structures & Algorithms.
